

1. Canon

- `__init__` 58
- `update_box_messages(messages)` "this function is to update the messages in box messages(Label self txt7)" 398
- `close_winsos_histogramm` "This function is to close the child window where histogramm have been plotting" 445
- `plot_global_histo` " this function is to know if we want to plot the global or the local histogram of the pixel selected" 467
- `_trace_histo_pixel_draw_and_plot`: "this function is to draw histogram in amplitude and tot of the pixels selected since the event display started and in the intervalle of 4s" 511
- `pause` " this function is relatif to the command of the pause button (b5). when pause is applying the Event display pause and when restart is applying, the event display continue when it has been paused"
- `quit`
- `stop it` 1071
- `start it` 1131
- `analyse_file_contain_rate_aux` 1253
- `get_board_value_from_file` 1330
- `_draw_trigger_rate_and_cosmic_flux` This function serve to draw trigger rate and cosmic rays flux. It is relatif to the command of the draw button(b12) 1876
- `_trace_trigger_rate_and_cosmic_flux` this function is to draw histogram in amplitude and tot of the pixels selected since the event display started and in the intervalle of 4s" 1974
- `_close_window_trigger_rate_and_cosmic_flux` 2081
- `daq_tdm_Applib_slotArray_v1` 2094 **ca a l'air important**
- `make_mini_cam_mathieu` 2153
- `def make_mini_cam_mathieu_with_node` 2174
- `find_neighboors_pixels_by_scipy_method` 2222
- `find_neighboors_pixels_by_my_method`
- `draw_camera_pixel_ids` 2350
- `draw_pixel_center` 2356
- `plot_pixels_grid_bis` 2362
- `plots_hex_in_canvas_pdp` 2388
- `clear_figure` 2438
- `trigger_software_in_pixel_configuration` 2446

2. Application "Fenêtre principale de l'application" 2473

- `init`

3. Hist1D_global 2518

- `init`
- `fill`
- `data`

4. Hist1D_local 2571

- `init`
- `fill`

5. Hist2D 2624

- `init`
- `fill`
- `data`

6. main 2661

- `kill`
-
